Online clothing store

About

This project is about an online clothing store where the user can view our products, add products to their carts , manage their cart, and purchase. Moreover the user can review and rate the purchased products. The user isn't required to register on the website unless he is going to make a purchase. Users can pay either by cash on delivery (COD) or by a credit card..The user is required to provide his contact info including his mobile number which will be confirmed with an OTP. Users can login via their social media accounts or OTP messages and every purchase the user makes must be saved so that the user can access it and see its current state. Finally the users can cancel orders and manage their profile info.

Product Backlog

Epics and User stories	Priority	RTP	Sprint	Status
➢ As a website user, I want to view the website products, so that I can find what I need.				
○ As a website user, I want to search by name, so that I can find what I need easily.	High		1
